

Roman Bugaev - Chief Technology Officer

Roman Bugaev is the Chief Technology Officer at Flo Health, where he has been a distinguished and hands-on technical architect since joining the company. With well over a decade of experience in software development, Roman leads a team of more than 200 senior engineers, each with an average of 10 years of experience. His team specializes in data-intensive applications, high-loaded systems, and complex infrastructures. Leveraging machine learning and AI, they provide accurate predictions and relevant, personalized, medically credible health tips for users, while managing sensitive data to design, develop, and improve security services and data engineering processes.

Roman is particularly proud of Flo's growth and the high-quality product his team has developed. He finds excitement in Flo's mission to provide individuals with valuable health insights and sees the complex, advanced technology behind the app as an exciting challenge for his engineering team.

Before his tenure at Flo Health, Roman was the Head of Engineering at Payfort (later acquired by Amazon), where he worked with a lot of private data in a regulated environment. He also served as the technology leader at Adform where he led the building of the Adform Data Management Platform, a breakthrough technology at the time that enabled the company to stay ahead of the innovation curve and achieve outstanding results.

Roman holds a Master's degree in Computer Science, spurred on by his love of technology which began at the age of 10, as his early interest in gaming evolved into a passion for programming.

He is a respected member of the tech and startup communities, Roman frequently participates in public events as a speaker and organizer, sharing his insights and expertise with the broader public.
